

## **1,100 Litre Road Towable Water Bowser Instruction Sheet**

- Take the bowser to the source of water, check that the bib tap is closed, then open the filler cap, insert the supply hose (ensuring it is held securely) and begin filling.
- Fill the bowser until the water is no more than 12" from the top, then turn the supply OFF and close and lock the filler cap.
- NEVER tow the bowser on the public highway unless it is empty, it is an offence, and you may be liable to a heavy fine if caught.
- Stand the bowser on a firm, level surface strong enough to bear its weight.
- DO NOT park on slopes, soft ground or where there is a risk of subsidence.
- Apply the handbrake and unhook from any towing vehicle, then set the jockey bar to the correct height.
- To transfer water simply open the bib tap by turning anti clockwise, you can connect a hose to the tap using the traditional 3/4 bsp connector.

### **EQUIPMENT CARE**

- Never use the equipment for anything other than its intended purpose. ONLY use the water bowser for water.
- Keep the equipment clean. You will find this less of a chore if you clean up regularly, rather than wait until the end of the hire period.
- When not in use, store the equipment somewhere clean, dry and safe from thieves.
- Handle the equipment with care.

### **GENERAL SAFETY**

- Keep children, animals and bystanders away from the bowser.
- Never use this equipment if you are ill, feeling tired, or under the influence of alcohol or drugs.
- This equipment should only be used by a competent person who has read and understood these instructions.
- Safety Goggles MUST be worn by everyone in the work area.
- Wear practical, protective clothing and fuel retardant gloves.
- Always double-check the bowsers general condition before use, paying special attention to tap connections, filler caps/lids and tyres. If any show signs of damage or excessive wear, DO NOT USE IT.
- Choose a site for the bowser that keeps it well away from ignition sources or contaminates.
- Double check that all taps and filler caps are properly closed before leaving it unattended.
- Ensure the tyres are in a road worthy condition and inflated to 65psi (4.48 bar).
- NEVER drink the water from a water bowser.
- The tow hitch is the loop and pin type, DO NOT try to tow the bowser with a ball hitch!
- You may only fill the water bowser with clean water.
